QUALIFIED ENGINEERS

We have a core team of qualified, friendly engineers who hold all the up to date, relevant industry certifications

INDUSTRY EXPERIENCE

We have been involved in over 40 new-builds and refits and can advise you on logical and reliable network upgrade pathways

VALUES & VALUE

Our core values are trust and integrity. Trust us to provide a reliable network that could save costly issues in the future

ABOUT US

We provide customised, reliable and cost-effective hardware, software & internet based solutions to the marine industry.

We tailor our services to each of our clients dependant on requirements, vessel and budget and assign each vessel with a dedicated support team.

Our certified engineers travel worldwide to install, commission and service a wide range of Satcom and IT hardware.

We work hard to build strong and trusting relationships.

We look forward to working with you.

We make things simple and easy to understand to avoid confusion and maintain efficiency

We strive to understand your requirements so that we can tailor our solutions to suit you

We never compromise quality - Using the best technology available ensures reliable service and connections

We complete projects efficiently with minimal disruption

VSAT & AIRTIME

Hardware:

- ✓ Supply
- ✓ Installation
- ✓ Servicing
- ✓ Maintenance

Our trained engineers ensure that installs are completed correctly and to the highest standard.

Using our state of the art diagnostic equipment, we are able to accurately calculate RF cable and connector loss, enabling us to ensure you receive the best connection possible.

COVERAGE

Five airtime providers to choose from, enabling us to tailor a package to meet your specific needs

FLEXIBILITY

Full flexibility on bandwidth and pricing structures, lay up periods and contract duration

SUPPORT

Timely and effective support on board and remotely for our range of terminals and services

We pride ourselves on customer service, fast performance and flexible contracts and we can supply speeds up to 100Mbps over 80+ beams providing near global coverage. We can also provide VPN, Smart DNS and VoIP services.

Time to change your VSAT provider?

OceanWeb
MARINE IT & COMMUNICATIONS

SATC

Registration & administration
LRIT compliance testing
Letter Of Guarantee (LOG)
SSAS systems & routing
Installation upgrades
GMDSS

FBB

Full hardware packages
Global coverage (ex. Polar Regions)
Flexible contracts
Usage management
Streaming & background IP data

IRIDIUM

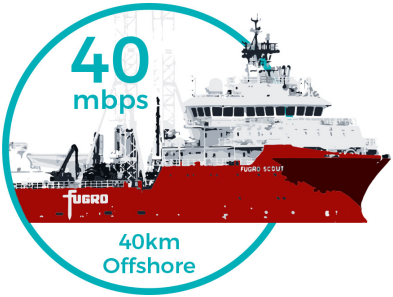
Iridium hardware
Voice and data plans
Full Global coverage
GMDSS option

4G

Roam seamlessly between countries without having to manage multiple SIMs or activate regional plans.

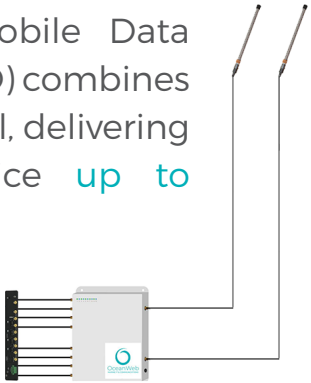
- Plans up to 10TB per month
- Full support, administration and monitoring
- Bandwidth aggregation / bonding
- Flexible contracts
- Data sharing
- Layup periods

Great Value Euro Data



Our Offshore Mobile Data Optimiser (OMDO) combines & boosts 4G signal, delivering a working service up to 40kms offshore.

(Router connected through our OMDO to external, mimo omni-directional antennas).



"We are currently 40KM offshore in the Baltic sea and have 100% signal with decent speeds" - Brendan Nisbett, ETO - Fugro Scout

GSM

For high clarity, good quality calls, we have the plan for you

Our extensive partner network provides great coverage throughout Europe and the UK as well as enabling you to experience worry-free roaming across a global network.

We provide, support and administer our UK SIMs and, using our in-office stock, we can have an activated SIM delivered to you within 3 working days.

The plans we offer present outstanding roaming value and allow you to work anytime, anywhere, with our engineers at your side providing support and assistance as required.

IT SUPPORT

We provide specialist IT support to ensure the smooth operation of your IT infrastructure. Our dedicated support engineers are on duty to quickly identify and resolve any issues.

- Live monitoring of networks
- Management, repair & upgrade of systems
- Comprehensive remote & on-site support
- On board & remote back-up systems

Our fully certified, knowledgable Engineers are alerted to any service connectivity issues via a remote monitoring system, This enables them to immediately begin work on finding a resolution, often even before our clients notice that any services are down.

Ask us about High Availability Gateways

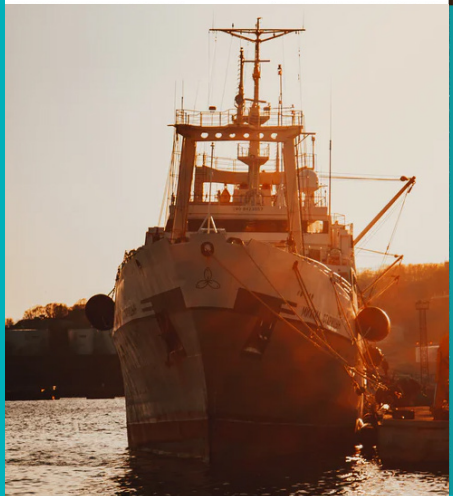
Our Remote ETO service is currently utilised by 40+ vessels worldwide and we've had great feedback from our Captains & Crew.

FIXT!

PROACTIVE NETWORK MONITORING

FIXT! enables us to detect faults before they become disasters and provide proactive remote support and maintenance to ensure tech performance on board is at its maximum.

This service is now available as part of our comprehensive IT Support Contracts.



- Environment Monitors
- Low Disk Space Alerts
- Hardware Health Indicator
- Root Cause Analysis
- Remote Maintenance
- Bandwidth Statistics
- Usage Reports
- Personalised Dashboards
- Centrally Managed

CYBER RISK SECURITY

Do you know where you stand with the IMO's Cyber Risk regulations? OceanWeb offer a variety of cutting edge Cyber Risk Security solutions that can help to safeguard the private information you hold and share electronically, ensuring that it isn't compromised.

MANAGED EMAIL

Don't compromise with a set email 'package' that imposes restrictions and limits.

We work closely with you to develop a bespoke and scalable system. Our core elements are:

- Design & Configuration
- Management & Support
- Protection & Security
- Shared inboxes
- Shared calendars & folders

BANDWIDTH MANAGEMENT

We can install systems to manage bandwidth across your off vessel connections.

- Content blocking and filtering to manage traffic e.g. social media
- Advanced anti-virus to limit exposure in BYOD environments
- Load balancing for efficient bandwidth use
- Device and user quotas to monitor and control activity

We now offer High Availability Gateways

High Availability Protection eliminates the risk and cost of lost connectivity and threat-protection downtime. If a crash or failure occurs, the second gateway will jump into action immediately and you will be consistently connected with no downtime.

WEBSITES

We can design and develop responsive websites, ensuring that look, feel and usability is consistent, no matter what device the site is viewed on. We also offer:

- Domain administration
- High quality hosting on dedicated servers
- Website update service

The perfect solution to raise awareness of your fleet.

SKY

We are official Sky Offshore resellers.

Offer your crew all the comfort of their own home with Sky content chosen to suit their needs.

From 24 hour news coverage and sports packages to cutting edge dramas, the best new comedy and the latest blockbusters, Sky has you covered.

TV

We can supply and install a wide range of TVRO hardware and our trained engineers will ensure that the install is completed to the highest standard.

IPTV

We can provide and configure the following:

- Netflix
- Amazon Prime
- Apple TV
- Plus many more!

They can be assigned to certain off vessel connections via your gateway to provide access to a huge library of HD content.

CCTV Features

- Intuitive mobile app
- Motion alarms & notifications
- Secure backup of recordings
- Low-light, IR and thermal imaging
- Secure remote viewing

CCTV

We can design and install bespoke CCTV systems using high quality cameras and you can play back and monitor footage from your own devices. Motion detection allows you to quickly skip through hours of footage to find the clips that you need.

VOIP

Our IP based internal telephone system allows internal calls to be made around the vessel as well as providing outgoing lines via GSM, SatCom, and SIP trunk

- Powerful Remote Management
- Softphone for iOS and Android
- PA System / Group Intercom
- Huge list of supported VoIP hardware with auto provisioning
- Voice, video and messaging supported
- Mobile use via app
- Doorbell integration
- Redundancy solution
